## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 18-23, 29, 30 and 33 drawn to method for forming a coating layer.

Group II, claim(s) 10-17, 24-28 and 31-32, drawn to die.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Nelson et al 2003/0116881 discloses the special technical feature of a forming a coating layer providing a plurality of fasteners that provides a compression force between the first and second die block and adjusting the compression force on the fasteners such that the profile of height uniformity of the coating slot through which the coating is extruded is 1 percent or less which is within the scope of the claim. Therefore, there is no unity of invention when the special technical feature is present in the prior art. Hence, lack of unity is held by the examiner in accordance with PCT Rule 13. Also see MPEP 1850-Determination of Unity of Invention.

A telephone call was made to office of Attorney Pamela Stewart (voice-mail) on 7/6/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda A. Lamb whose telephone number is (571) 272-1231. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton, can be reached on (571) 272-1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
